QuickFire® SureShot Wrap Around

Take Aim at Dirt with the QuickFire SureShot!

The updated QuickFire SureShot model builds on the proven, best-in-class QuickFire wrap around technology for front, side and rear cleaning to deliver a new standard in wrap around performance, durability and reliability.

With the unmatched ability to wash 200 or more vehicles per hour, Belanger’s QuickFire SureShot features a newly designed roller head assembly that delivers consistent and reliable Dual-Directional travel action. For optimal cleaning performance, the QF SureShot possesses the ability to accurately sense different vehicle lengths and widths and deliver complete, consistent surface contact, resulting in cleaner cars.

The QuickFire SureShot is the industry’s only wrap around that “chases” the vehicle through the wash, even at high line speeds, in the process “chasing” away hard-to-reach dirt on the vehicle’s surface. This is further enhanced by the patented DynaTrigger® Sizer that enables the QuickFire SureShot to “fire” across the rear of the vehicle for taillight-to-taillight coverage that effectively eliminates “skunk striping” with no need for manual prepping.

The bottom line? QuickFire SureShot’s reliability and flawless performance delivers unprecedented results at higher speeds without sacrificing wash quality – for increased customer satisfaction and your bottom line.
The QuickFire SureShot features design enhancements that stay true to the foundational elements of the original QuickFire:

**Enhanced Roller Design**
High-grade rollercoaster wheels travel unimpeded over a mill finished rail that eliminates slippage during the wash process that can compromise the system’s cleaning ability.

**Overlapping cleaning coverage**
Senses different vehicle lengths and widths for maximum wash-media contact time.

**Minimizes risk of vehicle damage**
Oversized socket joint in Built-To-Tilt 360º pivot protects vehicle.

**Provides a high-quality wash for 200+ vehicles an hour:**
The industry’s only “following” wrap that can provide complete rear cleaning at the highest line speeds.

**DynaTrigger® Sizer**
Improved performance making it easier to dial in and maintain the performance parameters for optimal cleaning. Custom cleans every vehicle, every time as the sizer senses and adjusts to different vehicle widths and lengths.

**REQUIREMENTS**

**Physical Examples**

<table>
<thead>
<tr>
<th>Tunnel Space Required</th>
<th>10’ 2 1/2”</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit Height</td>
<td>10’ 1”</td>
</tr>
<tr>
<td>Unit Width</td>
<td>12’ 9”</td>
</tr>
</tbody>
</table>

**Utility Examples**

**Electric Drive Option:**

- **Electrical Requirements:** (2) outputs from Controller @ 120 VAC (for Extend & Retract)
- (2) 1HP, 3-Phase, 208/240/460 VAC

- **Pneumatic Requirements:** 1 CFM @ 90-PSI minimum 120-PSI maximum

- **Water Requirements:** (2) 3/4” Hoses @ 8 GPM @ 40 PSI

**Hydraulic Drive Option:**

- **Hydraulic Requirements:** Same requirements as above plus - 6 GPM @ 900 PS
