

EXPAND YOUR C-STORE CAR WASH THROUGHPUT

THE MINI-TUNNEL SYSTEM BY BELANGER®

BELANGER 

HAVE YOU OUTGROWN YOUR IBA?

When your convenience store features a smaller bay, your In-Bay Automatic (IBA) car wash can max out quickly, leaving a high volume of cars to wash and potential revenue waiting in line.

That may be a good problem to have, but it's still a problem.

Fortunately, Belanger®
has been solving that
problem for 50 years.

WASH MORE CARS, FASTER, WITH A MINI-TUNNEL SYSTEM

Long lines can not only bottleneck your site but can also cause would-be customers to drive away. When you have limited space, you might feel you need to get creative to keep vehicles moving and improve throughput.

But the equipment you choose can determine your success.

Look to Belanger®, the originator of the mini-tunnel wash system.

LIMITED SPACE. BIG PROFITS.

Consistent traffic flow is the name of the game. Mini-tunnel systems aren't for everyone, but if your IBA is constantly maxing out your CPH, converting your site to a mini-tunnel system provides the blueprint for greater success.

DURATRANS® XDW CONVEYOR

The award-winning DuraTrans® conveyor features a revolutionary wide track to accommodate modern performance tires and its revolutionary design reduces downtime with simple operation and user-friendly functionality.

The all-new TruTrak™ conveyors are easy to drive on and move cars through the tunnel faster, with no need for an attendant, so you can keep traffic flowing freely all day.

MINIFLEX™ TOP WHEEL

Big performance with small tunnel space requirements. Belanger's MiniFlex™ top wheel needs less than 7 feet of tunnel space for excellent, quiet cleaning of hoods, roofs, and trunk lids.

GYRO WRAP™

Requiring just over 11 feet of space, the Gyro Wrap™ is a simple, rugged, tiltable wrap designed for total vehicle washing in a minimal footprint.

AIRCANNON™ DRYER

Built with energy-efficient impellers, the AirCannon™ dryer increases air velocity while using less energy. Operators can configure the nozzle angles to best fit the tunnel layout, making these dryers ideal for the smaller space of a mini-tunnel.

THE SIMPLE DIGITAL PROFIT CENTER

Getting more cars through your high-volume car wash starts at the payment terminal. ICS offers a full line of easy-to-use digital payment terminals like the **SmartStart® Pro**, **Auto Sentry® Flex**, **Auto Sentry® Petro**, and new **Auto Sentry® Max** with a brilliant 32" touchscreen display.

Each terminal is EMV-compliant and enables secure, convenient transactions, serving as a profit generator by moving customers through the tunnel quickly, monitoring their visit frequency, and developing personalized marketing using license plate recognition (LPR) technology.

ics

SMARTSTART® PRO

- Entry price point, 10.4" screen
- Cashless

AUTO SENTRY® MAX

- Eye-popping 32" display
- Bold cross-promotion capability
- Cashless

AUTO SENTRY® PETRO

- 15" easy-to-read monitor
- Cashless

AUTO SENTRY® FLEX

- 17" ultra-bright screen
- Accepts cash

 **WashCloud**

Integrated site monitoring is a breeze with WashCloud, which ties your customer and LPR data, equipment, and payment terminals information into an easy-to-use dashboard.

THE MOST RECOGNIZED CAR WASH CHEMISTRY BRAND IN THE INDUSTRY

TurtleWax[®]PRO

Turtle Wax[®] Pro has been synonymous with car care for more than 80 years. Our promise is geared toward your car wash success by providing industry-leading products tailored to each tunnel, with dedicated service and support.

The new chemistry standard for tunnel wash systems is here. Give each vehicle a powerful and complete clean with the Titanium TX4[®] system, a newly formulated, 4-stage process with ingredients that work together to deliver exceptional cleaning, protection, and shine.
