LASERWASH[®] 360[™] PLUS

NEW! PDQ LaserGlow Arch

LASERWASH[™] 360^{PLUS}

Specifications and Exclusive Features include:

- Over 1100 lumens for max total brightness
- Total 61 individually-controlled light segments
Each segment can display over 16 million different colors. (24-bit RGB color)
- Current machine software includes over a dozen pre-defined dynamic and engaging multi-color fading/scrolling patterns, four user-customizable patterns.
- With 13 preloaded programs and 5 operator-driven programs, the colors can be selected that match your brand, holidays, seasonal promotions or even hometown sports team's colors.
- When combined with inbay directional signage, the informative visual signals provide easy to understand guidance for your customers during the loading process.
- The LaserGlow Arch will not only get your wash noticed, but it will also allow customers to load faster, to create a more memorable car wash experience, and to ultimately generate more revenue.

Improved arch rotation navigation:

- New sensing system comprised of simple on/off digital proximity sensors
- Easier to troubleshoot & Increased tolerance of mechanical wear

Enhanced arch-impact detection:

- Provides impact-detection consistency
- Enables automatic testing of the impact-detection sensors

Improved arch rotation drivetrain:

- Larger 1/2HP motor
- Higher gear-ratio for improved torque and control of spray arch position

(Includes Patented and Patent Pending Technology)
